Greeting

Hello [firstname, fallback=] I'm most happy to be contacting you now!

Movies

On Wed 20 Apr 2011 I saw the movie fast and furious 5. It was quite good actually, despite having not seen the earlier movies. Certainly a lot of action. I remember one time they were stealing cars off a moving train, before it got to the bridge. Unfortunately they drove one of the cars off the cliff into the water. But it turned out they weren't too interested in the cars, really they wanted what was hidden in one of them, a chip. I won't say what was on the chip, you can discover by watching the movie haha.

Mum

On Sat 19 March 2011 mum and I went to sanurs indonesian restaurant to get takeaway from there. It was delicious! We had gado gado without egg, gulai, and nasi putih (jasmin rice) x 2.

<http://www.sanurs.com.au/poultry.html>
<http://www.sanurs.com.au/vegetables.html>
<http://www.sanurs.com.au/rice.html>

On sat 23 April 2011 I saw mum. We had lunch at ricardos in jamison, I had duck & chorizo burger with bacon, and mum had pumpkin soup i think. For dinner mum made kangaroo mince with rice and I also had broccoli with mine. Yum! We got a DVD "Dinner for Schmucks" which included this dinner where everyone had to invite someone stupid or weird. It actually was an OK movie.

On sat 30 april 2011 I saw mum. Surprise! Haha. No surprise. Anyway we had lunch at ricardos in jamison. For lunch I had salmon and potato with 2 sticks of asparagus and for desert chocolate/hazelnut slice. Mum had soup. For dinner mum cooked a soup, beef stock (from the supermarket in a carton), and added onion, potato, celery, and cooked roast beef (from the deli of the supermarket). The beef was only put in for a few minutes at the end just to warm it up. I had some broccoli in mine as well (cooked in the microwave). There was also some beef stock cube mixture (powder from a jar) and extra water (boiled first so its not cold). We watched a DVD called "Johnny English" which is rowan atkinson as a spy, quite funny though a bit predictable. Yes something always went wrong.

Anzac Day

I went to lunch on mon 25 april 2011 with some people (meetup group) at the labor club it was good, had a chicken burger and an iced chocolate. then when i got back to the mall i had a creaming soda because i haven't had one for ages and i felt like i wanted one but then i saw a sunkist (orange fizzy) so i wanted one of those too. except i did not get one because i decided i had done enough drinking of fizzy drink for one day. but i bought 2 flavoured milks one for today and one for tomorrow because of that i haven't had much calcium the last few days because the shops have been inaccessible due to the bus strikes. I didn't play 2up at the labor club because it was too noisy and crowded and secondly i didn't even know how to go about playing anyway.

Midi Controller Keyboard

I have bought a midi controller keyboard and stand off ebay (from two separate people one for the stand and one for the keyboard).

Walking and buses

This comes from an email I sent to one of my penfriends she said it was funny so here it is here.

Oh Deary me. I seem to be getting more and more unfit. I don't like walking. But it's better than running haha. I ran for a bus one time. Normally I'm just too lazy I'd rather miss it. But sometimes my feet just carry me forward, on and on, faster and faster, until I realise I'm actually walking quite fast indeed, and if this carries on too long it might actually be a run though unlikely because I'll probably get to the bus long before that, I'm not that desperate to catch the bus, I don't need the bus, I'm not in love with it after all, its just a bus, and I'm not devoted to just one bus, I catch all different buses I'm really not fussed I'm a many-bus man. LOL hahahahaha. though i have to admit i do seem to catch one of two buses from my place, but its usually at different times each day, depending on when i feel like going for lunch and whether i prefer a dressed or skirted bus (??). Lol hahahahahahha. yes thats right some buses have skirting boards? hang on what's a skirting board anyway all i know is i'm trying to make the bus sound like a woman wearing a skirt or a dress except really its a bus dressed up with orange paint and green writing saying ACTION BUSES or something like that haha.

Now thats my funny rant about walking and buses. Hope its funny. Sometimes I wonder Lol

Website

Hope you have had time to look at my website www.jevan1.com, it can take a long time to view it all its quite a big site as you can see, bigger than a cow and smaller than an elephant. Lighter than a feather its easy to understand for most people.

have a look at [jevan1.com](http://www.jevan1.com)

all the pages you could possibly want are there

your dreams go wild

links to celebrities and everything haha just joking lol made you look u dirty chook?

no its ok you can look its free why not

oh you've already seen it? great then you know it

I've made a new page <http://www.jevan1.com/pages/other-movieFavourites.html> which is my movie favourites (the ones I could think of).

Also I've made two more pages <http://www.jevan1.com/pages/music-internetRadio.html> and <http://www.jevan1.com/pages/music-songsILike.html>

The songs I like page, now has links to youtube playlists for each genre (if more than one song).

Now I've got 3 clocks on my home page (www.jevan1.com)! Philippines, Korea, and Canberra (latter is) where I live.

I've done a course called "Generating Traffic to your website" through CIT started fri 1 april 2011 and ran for 3 weeks on fridays 1pm-4pm. Basically they said to write articles with a link at the end to my website, and podcasts (audio) of an article, and video, upload, will generate more traffic.

There are now a few videos presenting the website [jevan1.com](http://www.jevan1.com) to you or welcoming you to it, see www.jevan1.com on the homepage (the presentation video you have to click and it opens in a new window to view it, the other videos just press play on the video).

On 12 Apr 2011 I put a search engine on my webpage (www.jevan1.com). It works by typing text in the box and then clicking Search.

Under music/Jevan Singing and Piano, on [jevan1.com](http://www.jevan1.com) : piano-1 is an improvisation, I just made it up on the spot, chords and notes and all. "Chicken" was actually made by recording the sound from the keyboard (the one I used

to have) (instead of the sound from the computer) it's a bit noisier/fuzzy because of this, I put the microphone of my headset near the keyboard's speaker and played the keyboard while listening to the rest of the tune already recorded on the computer speakers (not too loud so the mic doesn't pick it up), and recorded the various things into audacity software one instrument at a time. I don't really like the noisiness of "chicken". I prefer higher quality songs. So I wouldn't do that again.

University of Canberra Graduation

I've finally received my graduate diploma in IT in the mail (april 2011). It has been scanned and uploaded to my other/web resume section of my webpage (www.jevan1.com) if you click on the UC grades it opens in a new window along with the transcript and deans excellence award scan images.

Reddit

<http://www.reddit.com/user/jevan1/submitted/>

I submitted some photos and drawings to reddit. The cat drawing seemed to get the best votes. The others just stayed on 1 vote (my vote). My floriade photo got thumb downed from 1 to 0 votes. You can vote up or down. I'm not sure why, I thought it was a good photo.

Cupcakes

On Tue 29 March 2011 I brought 10 cupcakes to work, that mum had made.

The cupcakes were lemon (blue icing) or lime (green icing). At least that's what i think the colours were Lol. I know mum made some lemon icing and some lime icing. Mum juiced 3 limes for half the cupcakes icing, and a lemon for the other half of the cupcakes icing. I helped her put the icing on the cupcakes. Two teaspoons, take a bit of icing from the bowl with one teaspoon, then drop it onto the cupcake and push off spoon with other teaspoon, and try to spread it a bit.

My coworkers really liked the cupcakes, there were 10 (2 for me, and 4 people at work had 2 each, jill, katie, aimee, and alicia).

Actually she put 24 cupcakes in the container (3 rows of 8) but I ate them all except for 10 for tuesday at work.

Twitter

3606 followers now. Headed for 5000 eventually. [Twitter](#)

Buses

Am now using my concession MyWay card. Buses are much cheaper now than they used to be! Sometimes it makes a mistake and says "Change of Mind" when I tag off at the end of the journey.

Candle at Work

Fortunately they seem to have stopped using the strawberry candle at work. I wasn't too impressed with the scent. Maybe it attracted the rat we got haha. We've got a rat trap but it keeps avoiding it.

Life Story

If I had to write my life story it would probably be "not much work unfortunately as usual". But its ok i'm getting used to it. Just not much money but its ok. I will have more money when I move into public housing in approx november 2011.

If i had a time machine and could choose whether to either go back or forward in time, i'd certainly have to go forwards in time, because there's got to be more interesting things in the future for us and quality of life for humans seems to be progressively increasing as technology gets better, what's the next big thing after "the computer" in our list of inventions, it would be interesting to see. as long as we don't have too many environmental problems if the future is worse i'd like to opportunity to be able to go back to the present again. After all the grass might seem greener on the other side, but unless it's really greener, i might not prefer it.

Reporter on air suffers medical issue

<http://au.yahoo.com/s/276884>

<http://au.news.yahoo.com/odd/a/-/odd/9066460/reporter-suffers-on-air-medical-issue/>

He seemed to lose control of his mind for a short while, and was babbling. It just goes to show we are not perfect. Things do go wrong occasionally. I thought it could be a spiritual problem rather than medical.

Drink

Low calorie alcoholic drink I had could be called LOCAL since its available in the local supermarket. Lol. In fact its not called local. That's just me being silly. It's vodka cruiser (sugar free, low calorie).

Karaoke

On 24 march 2011 (thursday) I went to karaoke at the Old Canberra Inn, with a meetup group of people. I sang one song Mr Mister - Broken Wings. It seemed to go alright everyone clapped after, but then, they clap for everyone. I didn't feel like singing any more songs.

http://go.ebizwebpages.com/katereoke/song_lists

Cards

Actually didn't draw the 4 easter cards that I made (see last newsletter for pictures of them), they were stamped onto the card, and then I coloured it in using watercolour crayons? dipping the brush in water then wiping the brush on the crayon and then the brush onto the cardboard. They were special brush pens that can hold water inside them actually (transparent plastic colour), though mostly there was no water in them so we had to dip in water ourself.

Naughty Places

My chat friend marie tells me they have naughty places in the phillipines, that she would go lots of places with me but not those. I wonder what they are haha. Did curiosity kill the cat like the song says?

Jazz

On 27 April 2011 I went to see The Andy Butler Group 8pm-10pm at the big band room, canberra school of music (ANU grounds) for \$15 each. We got there at 7.45pm which was good timing because there was nothing to do until it started. There was piano, sax, trumpet, and drums (no bass). The music was quite good actually, it was all compositions by the school of music students in the band.

<http://music.anu.edu.au/events/anu-jazz-series>

Friends

A friendship is like a box, it's what you put into it not what you take out of it. That's slightly modified from "relationship" being like a box, that one of my penpals said to me.

A Poem I wrote

Am I a cat or a mouse

am I chased? Or Chaser?

Seems I'm neither

Just playful jumping like a kitten
with a ball of string in the air
trying to get it down
unfortunate that I cannot reach it properly

The string is like all the friends on the internet
that i don't know what to say to sometimes
i can't figure out what colour the string is
but it really doesn't matter
because string is string
string is fun

Especially when its all tangled up in a mess
hoping to sort it out im a sorter
like to untangle the string and roll it neatly back onto the roll
but nope all i seem to do is jump for it in the air and half the roll comes tumbling out onto the floor in one big
mess
just like a kitten
i don't care
or do i?
when it knocks me on the head and gives me a taste of bouncy fun
really its just a lightweight bundle of string
how harmful could that be
maybe some human could trip when they come in
and see this mess
someone will tidy it up
but not me, im just like a big cat
i just like to chat with you thank you

Hot Cross Buns

For breakfast today (24-apr-2011) I had 2 hot cross buns, and 3 easter eggs (little ones). Mum had her easter eggs yesterday and she kept finding bits of chocolate in the lounge chair, she must have dropped some, so I jokingly said Look what's that huge bit of chocolate on the chair! and she looked Lol hahahahaha it was a joke Lol. Because earlier I had said whats that black thing on the ground and it had turned out to be some chocolate so she was all set to find some more.

Singing in the bathroom

If I sing in the bathroom it echoes which makes me sound louder and better. Well louder is not always better, unless its quality sounds too. But it seems good.

Sleeping

One time I needed a more powerful sleeping tablet to put me to sleep. It's the only time I've ever taken that one. Normally I take less powerful "valerian" if I can't sleep which is usually enough. Anyway I noticed on these more powerful ones, that it said on the packet: may make you drowsy, if affected do not drive or operate machinery. Lol. Seems rather obvious to me. Of course its unsafe. Because it's going to put you to sleep for 8 hours! Just thought I'd mention since it seemed like a funny sticker to have.

If I get this job I applied for I could be saying
"Hello, AirServices Australia, How can I Help Me i mean You?"
Hahaha

Lately its late oh quite late lately later and later it seems to be late. but i would like it to
be earlier its early it seems early quite early indeed earlier now than earliest it used to
be early now its early still quite early sometimes maybe soon?

Clock a doodle doo
Not cock-a-doodle-doo like it's supposed to be
haha its a joke

Are you still there? How's things? Knock Knock anyone inside? Kadoodle. Spadiddleyou.
Thats not a swear word its just nonsense that i was writing because i can't think of anything
better to say. How's it doing?

Whats new? Anything happening? Haha Any fireworks gone off? Just Joking haha

I know all about you. Even about your cat named dongle. Just Joking hahahahaha

Lets get the penpal ball rolling. This huge heavy ball i'm attached to, that follows me everywhere I go,
needs to Roll.. all the way to overseas or interstate to you. Might be too heavy for the plane.
Just Joking haha. Don't worry I'm not coming to get you hahaha.
Meow, meow, glorius meow
nothing quite like it for purring the blanket

meow, meow, glorius meow
i really like to pat you so you purrrr

I just noticed i have meeeeeeeeeeeeeeeeeeeeeail
Meeeeeeigh L
like horses go neigh well this is a neigh kind of Mail
Maybe i should try and program my mailbox to go NEIGH when mail arrives in it. I don't know how to do that
though.
I'm not sure if you can set the sound it makes when mail arrives, for outlook express.
It's not that advanced.
But people would wonder what a horse has to do with my mailbox.
Everything.
You see there's a horse hidden in the computer, calculating all the windows and everything.
Haha.
Joking
Haha

One chocolate, only one chocolate per person, can't have two chocolate milkshakes at the same time, its just
wrong, overdose, nope its unfaithful to the choc.

Hot chocolate. So hot, its a chocaholics dream.

Blue Bottle and Cloud Computing

Blue bottle, orajjsh bottle brown bottle pink bottle multi coloured bottle red bottle green bottle purple bottle
yellow bottle white bottle black bottle bluebottle

yes its bluebottle.com

Haha i seem to wonder why they called it blue bottle after all theres so many colours. what happens if you want a
green bottle.

Green bottle <http://greenbottle.com/home.aspx>

and for some reason yellowbottle.com seems to go to microsoft IIS which talks about cloud services. After all
what are cloud services, is it some kind of new hovering technology that lets you hover and float up into the

clouds while you sleep. What about the roof, or do you have to sleep on a mat outside on the grass? What if you come down onto someone else's mat how do you make sure you get the right mat. What if you impinge on someone else's cloud. And if you're talking about cloud computing? Maybe that's where you throw your computer out the window of the plane? But what about depressurizing is it even safe, maybe you need to leave the PC on the wing of the plane and when it dips to turn a corner, the PC falls off into the clouds and makes a cloud computing scenario. Unfortunately it only lasts a while and can endanger anyone on the ground below, cloud computing is a real risk for farmers in isolated regions because they could be hit by a falling computer at any moment while they are innocently ploughing their field. The problems with advances in technology! But now we have cloud computing protector! It's a solid state (metal) hard hat that the computer hits instead of your head, and can be worn inside and out (just in case a computer crashes through your house roof). In fact, these days when government computers are processing social security payments using cloud computer networks is a real risk for flying computers aircraft are advised not to fly on those days which causes large delays at airports and long queues but it's better than flying into a computer while you're in the cloud.

Now what really is cloud computing?

Well apparently it's either, where you use some software on a remote machine via the internet so you don't have to pay the license fee for the software only for the computing time of the remote machine. Or, where your software uses a remote computer for some of its more computationally intensive calculations, therefore saving you from needing to upgrade your computer to make it faster, but at the cost of paying for some CPU time of that remote computer.
