

Newsletter - 24 January 2012

The latest version of this newsletter is available for free by subscribing at <http://www.jevan1.com>. Previous issues are available for purchase cheaply, see <http://www.jevan1.com>

Hello

This newsletter I thought I would try something different. Instead of going through my emails sent and copying from them, I thought I would write some original material, maybe a little unusual but hopefully interesting, and maybe some of it might even be humorous (if not theres always your humerus bone to tickle, part of your arm, though you won't laugh unless its under the arm, ooo smelly?, the things one has to go through to get a laugh these days).

Yes thats right, comedians of 2012 now have robotic hands with fingers attached to your seat that tickle you under your arm, whenever the comedian opens their mouth, it is synchronized electronically, so jokes are no longer funny. Unfortunately one malfunctioned and someone was tickled to death. It was a tradgedy and their kids are now looked after by their father who vows never to go to a comedy night again, lest tradgedy strike again at the hands of the helpless victim of technological laughing failure.

The newest version of "the tickler" device can also tickle under your feet, the floor moves and turns into a series of laughing tickling tentacles that target under your shoes, while you sit innocently wondering why the jokes are so unfunny these days. The tickler mark 3 can even remove your shoes for you, in the guise of keeping the carpet clean, so that it can access your soles to tickle tentatively with its tentacles.

How have you been lately? I hope not under the weather, after all, the weather has been good lately here, nice and warm. How has the weather been there? Whether or not its good, is a question of weather, as well as whether. Umm thats an old joke to use that double meaning. But a funny one just the same. At least I think its funny.

I'm desperately running out of things to say. Like an engine running low on fuel. Except i had dinner today already. So it can't be the fuel. Maybe it is food generated from solar power, shining down on fields of pasta (i had spaghetti bolognaise). Hang on pasta doesn't grow on trees. Maybe the spaghetti bolognaise will grow on trees of the future, genetically engineered to serve plates of dinner from its branches like a broccoli sprouting into fruition. Different trees will grow different dinners. But personally I suspect its more likely that chemical printers of the future will be able to print out dinners. How likely is that? I'm sure its possible. How about I add it to my webpage, as a new "idea". After all we got 3d printers that can print out a plane, furniture, etc. What's next, 3d printers for food? Why not. Sorry this is not a joke. Hahahahah. But its serious.

OK that's all the silliness i got left in me. Now I'm back to being serious. That's why the last thing was an "idea" not a joke. Coz I ran out of laughter. I need to be enjokened again, ready for a new spurt of humour.

Alright here's some talk about my website (www.jevan1.com). The latest things to be added since the last newsletter are, Art/Dreams (created 31/dec/2011, updated 15/jan/2012) read all about my dreams, Music/Jevan Originals (added JazzItUp on 11 jan 2012), Art/Other updated link to woman4 drawing video on youtube to new video (its 3 times the speed now, so you can view my wonderful drawing demonstration in 3 times the time), Music/Jevan Originals (added Mystery on 28 dec 2011, and babadooba on 21 dec 2011) 3D-Flare3D added 10 december 2011. You can find the "Whats New" on my homepage (www.jevan1.com) that lists whats new and the date it was added.

Did you see the new doll that speaks 10 languages. Unfortunately it only knows one word "hello" hahahahahaha.

Alright well signing off for now.

Hope everything is going well for you.

Best Wishes for 2012 and beyond

From Jevan

Goodbye

Thank you for reading this newsletter. I hope you find it as entertaining as I did in writing the things that went into it at the time.
